The image shows a Kali Linux installation window titled "KALI". The main heading is "Select your location". Below this, there is explanatory text: "The selected location will be used to set your time zone and also for example to help select the system locale. Normally this should be the country where you live." This is followed by another instruction: "This is a shortlist of locations based on the language you selected. Choose 'other' if your location is not listed." Below the text is a scrollable list of countries and regions. The list includes India, Ireland, Israel, New Zealand, Nigeria, Philippines, Seychelles, Singapore, South Africa, United Kingdom, United States (which is highlighted in blue), Zambia, Zimbabwe, and other. At the bottom of the window, there are three buttons: "Screenshot", "Go Back", and "Continue".

**KALI**

Select your location

The selected location will be used to set your time zone and also for example to help select the system locale. Normally this should be the country where you live.

This is a shortlist of locations based on the language you selected. Choose "other" if your location is not listed.

*Country, territory or area:*

- India
- Ireland
- Israel
- New Zealand
- Nigeria
- Philippines
- Seychelles
- Singapore
- South Africa
- United Kingdom
- United States**
- Zambia
- Zimbabwe
- other

Configure the network

Please enter the hostname for this system.

The hostname is a single word that identifies your system to the network. If you don't know what your hostname should be, consult your network administrator. If you are setting up your own home network, you can make something up here.

Hostname:

### Configure the network

The domain name is the part of your Internet address to the right of your host name. It is often something that ends in .com, .net, .edu, or .org. If you are setting up a home network, you can make something up, but make sure you use the same domain name on all your computers.

Domain name:

Рис. 10: (рис. 10. Domain name)

Set up users and passwords

A user account will be created for you to use instead of the root account for non-administrative activities.

Please enter the real name of this user. This information will be used for instance as default origin for emails sent by this user as well as any program which displays or uses the user's real name. Your full name is a reasonable choice.

*Full name for the new user:*

Рис. 11: (рис. 11. Создание пользователя)

Set up users and passwords

Make sure to select a strong password that cannot be guessed.  
Choose a password for the new user:

••••

☐ Show Password in Clear

Please enter the same user password again to verify you have typed it correctly.  
Re-enter password to verify:

••••

☐ Show Password in Clear

The image shows a Kali Linux installation window titled "Set up users and passwords". It features a blue header with the "KALI" logo. The main content area is light green and contains instructions for creating a new user. It includes two password input fields, each with a "Show Password in Clear" checkbox. At the bottom, there are three buttons: "Screenshot", "Go Back", and "Continue".
